

“Lying to the American people
wasn't part of my job description.”

Ralph W. Moss, PhD

SECOND OPINION

LAETRILE AT SLOAN-KETTERING

While Ralph W. Moss, PhD was still an anonymous participant in *Second Opinion*, he sent his evaluation of Sloan-Kettering's papers on their Laetrile studies (Special Report on Laetrile) to Dr. Sugiura, who was the lead scientist conducting the studies. This letter is Dr. Sugiura's response to Ralph's evaluation of his work and how Sloan-Kettering diabolically manipulated the positive data. The letter is addressed to Alec Pruchnicki, the only public "face" of *Second Opinion* at this time.

Second Opinion: Laetrile At Sloan-Kettering is available on Blu-ray, DVD, and Video On Demand.

Also available is *Doctored Results*, a new book & companion guide to this documentary by Ralph W. Moss, PhD

Dear Mr. Prachnicki:

I wish to thank you very much for the copy of your paper entitled "Second Opinion Special Report: Lactile at Sloan-Kettering", November 16, 1977, which you so kindly sent to me last week. I read your Paper in the Monograph with great interest. Your critical review of my positive results and negative results of 3 investigations at Sloan-Kettering Institute is very well done and accurate. Please accept my sincere congratulations.

Many thanks for your kind words about me

and my work on the effect of amygdalin (laetrile)
on the growth of spontaneous mammary cancer in mice
and lung metastases I greatly appreciate it. I will
continue experimental chemotherapy of cancer until
under the direction of Dr. C. Chester Stock.

With best wishes,

Very sincerely yours,

Kanematsu Sugimura
