

ERYSIPELAS GERMS AS CURE FOR CANCER

Dr. Coley's Remedy of Mixed
Toxins Makes One Disease
Cast Out the Other.

MANY CASES CURED HERE

Physician Has Used the Cure for 15
Years and Treated 430 Cases—
Probably 150 Sure Cures.

Following news from St. Louis that two men have been cured of cancer in the City Hospital there by the use of a fluid discovered by Dr. William B. Coley of New York, it came out yesterday that nearly 100 cases of that supposedly incurable disease have been cured in this city during the last few years, all through the use of the fluid discovered by Dr. Coley.

This fluid which is known to medical men as "mixed toxins of erysipelas and bacillus prodigiosus," has saved many lives all over the world, medical men say. It has in recent years come to be used in almost every country where the medical profession is in an advanced state of progress. A peculiarity of its effect is that it gives the patient a mild form of erysipelas, and the system in struggling against the new disease, throws off the other and more serious disease. There is no secret about the remedy, for, following his discovery, Dr. Coley gave its benefit to the medical world at large. That was about fifteen years ago. Since then the fluid has been improved upon and its effect is now more sure and safe than in its earlier use.

The fluid is now made at the Collis P. Huntington Research Laboratories in Germantown, Penn., of which Dr. Martha Tracey, a woman physician, is the head. The Collis P. Huntington Fund for Cancer Research in this city also handles the fluid and distributes it. The formula used at the laboratories in Germantown was discovered by Dr. Coley, and the latter has more cancer cures to his credit than any other surgeon in the world. Dozens of cases have been treated and cured free of charge by Dr. Coley in the General Memorial Hospital at 106th Street and Eighth Avenue. Many other sufferers from cancer have been cured at his private sanitarium.
